145 Brattle Street,
Cambridge, Mass.

August 12, 1918.

Dear Miss Moore:-

Your letter of July 24 should have been answered ere now but was not because of comparative ill health, which has interfered somewhat with correspondence of late.

Of the birds you desire, to replace those destroyed by the kitten, I can certainly contribute - and shall be most glad to do so - a Myrtle (♀), Pine (♂) - Black-poll Warbler (♀), a Swamp Bunting (♂), Red-poll ♂, Fox Sparrow (♂), Savanna Sparrow (♂) and Olive-back Thrush (♂). This leaves only the Golden-wing Warbler of which, unfortunately, I have none to spare. Please let me know when & where the specimens should be sent. I'm going away to-morrow & may not again

I believe this is what you have not the list -
